UNITED STATES OF AMERICA.

Note-Maturity and Date-Differential Tables.

By Geo. D. Rise, Lebanon, Pa.

—:0:—

The Note-Maturity Tables show, at a glance, the exact day of maturity (the last day of grace) of Notes dated any day in the year, whether the notes are made payable from five days to one hundred days after date, or from one month to twelve months after date ; giving also the changes when the Notes are dated, or mature, in Leap-Year. Perpetual.

—:0:—

The Date-Differential Tables show the number of days from any date in the year to any other date in the year, the result in every case including both dates, as is banking custom.

For Banks, Bankers and Business Men generally.

Price, postpaid, One Dollar ; Six copies for Five Dollars.

Note-Maturity Tables, without grace.

For use in States where Three Days' Grace are
NOT ALLOWED.

Several States of the Union have abolished the allowance of "three days' grace;" it is likely that other States will adopt the same custom, and the subject of recommending such action is being seriously considered by the American Bankers' Association and by some of the State Bankers' Associations. In view of possible changes by reason of such legislation, I have added to this book a set of Maturity Tables [pages 115 to 209 inclusive] giving the maturity of notes dated any day in the year, including Leap-Year changes, for use in such States as do not allow three days' grace.

NOTE-MATURITY
and
DATE-DIFFERENTIAL
TABLES.

--:0:--

The use of these Tables will save Bankers and other business men much labor and time in reckoning the date of maturity of notes, and also in calculating the number of days from any day in the year to any other day in the year, (the result including both dates, as is banking custom.)

The tables give these points at a glance, without any chance of error. The busy man has scarcely the time to spare to make the calculations necessary to obtain results, and tables that are accurate, that are conveniently arranged, and that contain the information that is wanted, are always in demand.

It is a well-known fact that Banks often suffer loss by reason of protesting notes on the wrong day—not the exact day of maturity—through errors made in reckoning.

A note protested in error, before its exact day of maturity, makes the offender liable to an action for damages ; on the other hand, if the note is protested a day too late, the endorser is relieved from liability for payment thereof. The object of this work is to save all the labor of making the reckonings, (and the consequent chance of errors,) to save much time to a busy class of workers, and to save the risk of damage or loss by reason of errors.

Geo. D. Rise.

Lebanon, Pa., 1891.

The Note-Maturity tables give all changes that occur by reason of Leap-Year.

The day of maturity given is, in every case, the last day of grace.

Examples :

A note dated January 9th, at 75 days after date, will be due March 28th (see page 8) ; in leap-year the same note will be due on March 27th (see page 9).

A note dated April 26th, at 40 days, matures on June 8th ; if dated April 26th, at 10 months, it matures on March 1st ; if dated April 26th, at 10 months, and the note should mature in leap-year, the date of maturity will be February 29th (see page 41).

INDEX.

Note-Maturity for notes dated in January, Pages 6 to 19

[illegible]

Date-Differential Tables.

Examples :

From January 5th to September 25th=264 days (see page 102.)

From September 20th to May 1st=224 days (see page 110.)

In case either of the above examples should include February 29th, add one day to the result.

Number of days from any day in JANUARY to any day in the year, the result including both dates.
